

**DATA MESSAGE & TYPE DEFINITION SCHEMAS**

Set forth below is a schema model showing the data message to be disseminated through the subscription. Within the message are information containers (Submission, Offering, Issue, Securities, Document, File, and Underwriter) and the information types and values associated with each.

## XML MESSAGE SCHEMAS

Detailed below are Data, Document and Type Definition schemas. The Data and Document schemas describe the base structural containers which in turn reference child-level containers and specifications described in the Type Definition schema.
